

Yuh Blockin – BVI Q&A; Preparation

Prepared responses and simulated Q&A; tailored for BVI culture, focusing on trust, practicality, and real-world use.

Trust & Privacy

Q: Who seeing my information?

A: Nobody seeing your personal info—no name, no number—just a secure message to solve the issue.

Q: What stopping people from abusing it?

A: There's reporting, blocking, and controls in place, so anybody misusing it can be dealt with quickly.

Real-Life Use

Q: What if the person don't have the app?

A: It starts with users who have it, and as people see the benefit, it spreads naturally across the island.

Q: What if I put in the wrong plate?

A: Nothing happens—you're not exposing anything, and the person can just ignore it.

Q: What if they ignore the message?

A: Same as real life—you can't force it, but this gives you a faster, easier option than asking around.

Cultural Concerns

Q: This going cause confusion or problems?

A: It actually reduces problems because you're not confronting anyone—just solving it quietly.

Q: People here slow to use apps...

A: That's why it's built simple—no learning curve, just open, search, and message.

Government & Legitimacy

Q: You working with government?

A: Not yet, but it's built in a way that can easily support government and public systems.

Q: Is this legal?

A: Yes, because no personal data is shared—just secure, controlled communication.

Money & Growth

Q: How you making money?

A: The base stays simple and useful, with revenue coming from partnerships and business integrations.

Tech Credibility

Q: You build this yourself?

A: Yes—designed and built locally to solve a real problem we deal with here.

Future Expansion

Q: What else this could be used for?

A: This same system can handle deliveries, events, and even public service communication.

Core Question

Q: Why we need this?

A: Because it solves a problem we deal with all the time, in a simple and respectful way that fits how we live here.

Live Q&A; Simulation

Examples of real responses:

Nobody seeing your identity—just the message.

That's controlled with reporting and blocking.

It spreads naturally once people see the benefit.

This gives you a direct option instead of asking around.

Built to support future government systems.

Focus is solving the problem first, then expanding.

It reduces confrontation, not increase it.

It's built because it's a real everyday issue.
